Fall potatoes: Percent of major varieties planted, 7 major States, 2001 crop 1/

	First		Second		Third		Fourth	
State	Variety	Percent	Variety	Percent	Variety	Percent	Variety	Percent
Idaho	Russet Burbank	70.8	Ranger Russet	11.1	Russet Norkotah	8.4	Shepody	3.8
Maine	Russet Burbank	29.1	Frito-Lay	12.6	Shepody	11.4	Superior	8.9
Minnesota	Russet Burbank	52.9	Norland	24.2	Atlantic	4.4	Pontiac	3.8
North Dakota	Russet Burbank	34.6	Norvalley	17.4	Shepody	14.1	Norland	10.7
Oregon	Russet Burbank	38.9	Ranger Russet	22.5	Russet Norkotah	12.3	Shepody	10.8
Washington	Russet Burbank	35.3	Ranger Russet	19.9	Russet Norkotah	19.3	Umatilla Russet	12.1
Wisconsin	Russet Burbank	26.5	Frito-Lay	15.9	Russet Norkotah	15.2	Goldrush	11.4

<sup>1/</sup> NASS conducts potato objective yield surveys in 8 major fall States, accounting for about 89 percent of U.S. fall production. In the 7 Objective Survey States shown, all areas of each Sate are sampled in proportion to planted acres. The table above is derived from reported data intended to provide current information on varieties but is not designated as an official estimate. Percentages do not add to 100 because only four major varieties grown in each State are given. Source: "Crop Production," National Agricultural Statistics Service, U.S. Department of Agriculture.
